

Any% Marathon Strats

Different than the "normal" Any%, these strats are tailored for marathon/live events for a no-reset blindfolded run completion. (And because too often RNG game stink)

Path

Level order: Himalayas, African Mines, Transylvania, Amazon, The Moon, Transylvania bis.

You take a detour in Himalayas going for the extra health route, then falling in purpose to respawn but with full health, also taking the hidden 1UP on the path to the boss.

Then you go for the extra Treasure in African Mines, to have more than 3M\$ (extra full life refill) before Transylvania.

Another smaller detour in Transylvania to collect the 5th HP slot, in order to go through more hits from Magica de Spell.
