

Blindfolded Strats compilation

Moon Skip (by Civel)

My FINAL version of The Moon Skip manip for blindfolded speedruns!

- ⚠ No fast fall start!!! VERY IMPORTANT!!! So you can't take the previous level chest from above: you have to swing the chest from the side and walk to the treasure from the side.
- Upon entering the Moon level, buffer D+R+B for instant pogo until after passing under the top chest.
- Scrooge have to be hit the 2nd flying duckbot to despawn the 3rd one, and normalise the first jump sequence.
- Ennemi manip for the clip: second jump sequence starts with the music: [counting double time = 8/8]
 - 16 beats DR+A+B > R,
 - jump at 5 after, release jump at 6, D at 7,
 - release D at 10-10.5 (keep R pressed to walk right and avoid being hit)
- THE CLIP: Just hug the green wall and without moving left: input D+L+B. The bot will hit and clip you into the ground.
